Part III REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach, disclose, or suggest the claimed limitations of (in combination with all other limitations in the claim), a method for driving laser diodes arranged in close proximity to one another in a laser recording device by charging each laser diode by a driver current that determines a light power output by the laser diode, with the driver currents, controlling video signals modulated with information to be recorded ; connecting a correction unit between a first laser diode forming a crosstalk source and a second laser diode forming a crosstalk sink; controlling the correction unit with the video signal or the driver current of the first laser diode; employing an output signal of the correction unit as a correction signal video signal or for the driver current of the second laser diode, and determining a transfer function of the correction unit such that an optimum for the compensation of crosstalk is achieved between the laser diodes as claimed in claim 1. Similar features are claimed in claims 9, 12, and 13. Therefore, claims 9, 12, and 13 are allowable over the prior art of record for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
